

PLATELET RICH PLASMA REGEN ACR (VAMPIRE FACE LIFT)

Platelet rich plasma, applied subcutaneously at a very superficial level, leads to its extraordinary revitalisation - the skin acquires richer colour, hyper- and hypopigmentation are considerably reduced, wrinkles become invisible. Plasma has a beneficial effect on all scars and blemishes on the facial skin, stimulates inactive follicles, which, in effect, leads to hair growth and the inhibition of alopecia.

INJECTION LIPOLYSIS DERMASTABILON

It's a safe treatment aimed at non-invasive body modelling. It helps to remove the areas of excessive fatty tissue, which do not diminish despite diet and intense physical activity.

AESTHETIC MEDICINE TREATMENTS

ALL TREATMENTS ARE PERFORMED BY
DOCTOR NORBERT ŻOCHOWSKI -
A PHYSICIAN WITH NEARLY A DECADE
OF EXPERIENCE IN AESTHETIC MEDICINE.

BOTOX

Botox is a purified protein produced by bacterium Clostridium botulinum, used in medicine for many years. It inhibits the conductance of stimuli from nerves to facial muscles, preventing the contraction of those muscles and skin wrinkling. The effect becomes visible gradually, and the function of the nerve and muscle endings is resumed after approximately 4 - 6 months. Thanks to the action of the botulinum toxin the facial expression does not change, whereas wrinkles disappear.

PDO THREADS

It's a lifting treatment, with the use of synthetic threads that dissolve in tissues. The technique is based on the use of natural skin tightening lines, which gives the effect similar to that achieved after a surgical lift. Thanks to the treatment we can reach the effect of muscle relaxation and the smoothening of facial features. We stimulate the action of new collagen cells and elastin, and we facilitate the synthesis of the natural hyaluronic acid, which is also a natural ally in the fight for a youthful appearance.

The cost of one thread is PLN 80. With the purchase of over ten items the price is determined individually.

A consultation costs PLN 100 and this amount is deducted if the Client decides to undergo the treatment.

HYALURONIC ACID

Hyaluronic acid is naturally present in our body - it retains water in tissues, and it decisive for for skin resiliency, elasticity and smoothness. Thanks to its hygroscopic properties it helps to retain tissue moisture at the appropriate level.

With age, the quality of connective tissue deteriorates; thanks to the treatments our skin regains elasticity; blemishes and wrinkles disappear, and the face regains a youthful and glowing appearance.
